First Line Supervisor's Blowout Prevention - Description

This course is designed primarily for the First Line Supervisor (driller) on a drilling rig and is also a prerequisite for the Second Line Supervisor's Well Control course.

Topics covered in the four-day course include source and magnitude of pressure, causes and warning signs of kicks, shutting procedures, crew positions and duties during well control operations, procedures for circulating out influxes and government regulations.

At the conclusion of the course, the participant is able to use warning signs to recognize a kick and safely shut-in a well. Upon successful completion of the First Line Supervisor's Blowout Prevention examination, the participant receives a Enform First Line Supervisor's Blowout Prevention certificate which is valid for three years.

Note: Students may attend this program up to three (3) months in advance of their certification expiring. Upon successful completion of the program, the student will receive their new certificate dated three (3) years from the expiry date of the old certificate.

Note: The exam can be challenged and rewritten once and, if the student fails, then the student must take the entire four day course. (Fees apply). From the day the exam was written there is a 7 day waiting period between rewriting. Exam challenges, courses and Self Study may be done up to 90 days prior to the expiry of the certificate. If the exam is successfully passed, the new expiry date will expire three years beyond the present certification expiry date.
